

# 1.0 Homepage

## Navigation Bar

Navigation bar has logo, links to main pages, search bar and Email Address + Telephone.

## Slideshow

Most prominent element in the homepage will be the slider, which will contain images of services along with links to specific sections.

## Our Services

Users are mainly interested into discovering what can the center do for them. This is why Services is the first section right after the slider.

## About Us

For users is really important to become familiar with the center before making a decision on whether to contact them or not.

## Testimonials

Reading information on how the center helped others is really important for users to make a decision on whether to contact them or not.

## Latest Articles

Users can be educated on the origins of some of their problems. Showing the most recent blog articles will give users more reasons for coming back to the website.

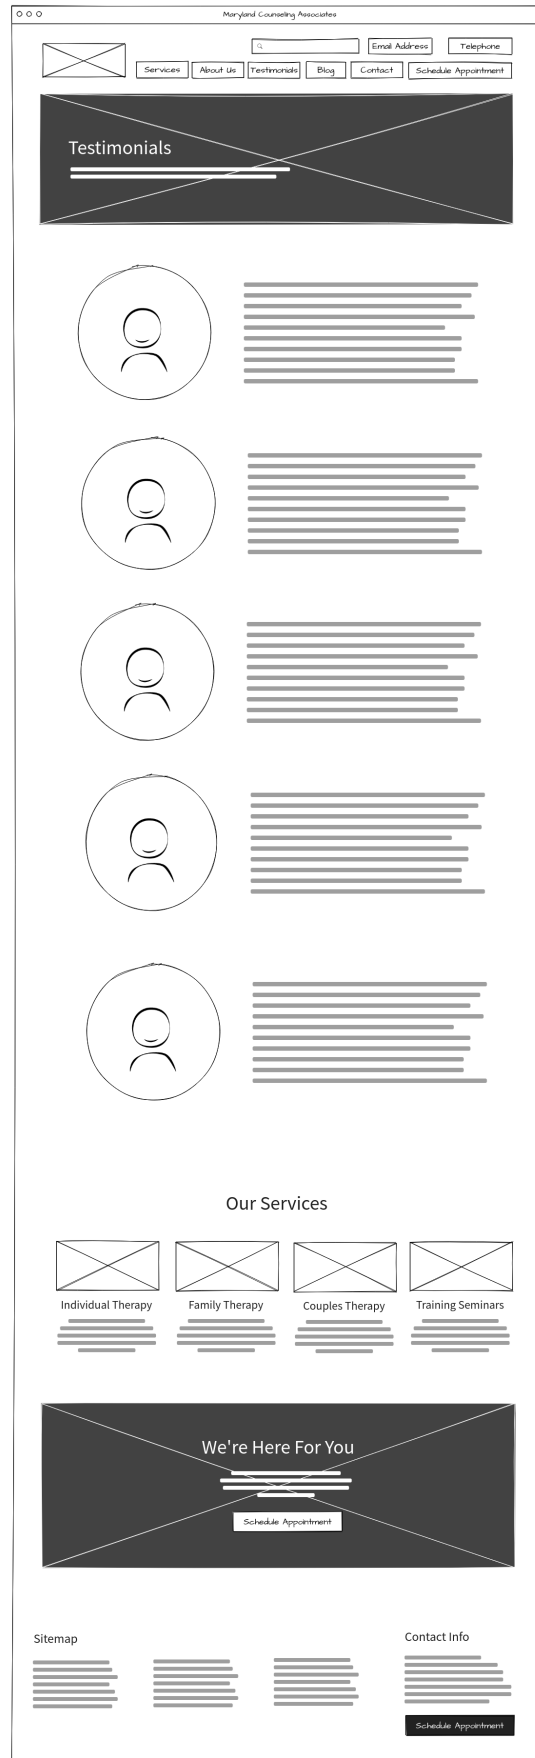

## Schedule Appointment

Having a quick link to Schedule Appointment page is very important for facilitating users to start treatment.

## Footer

As part of the footer we will have the sitemap and Contact Information (Including button to Schedule Appointment).

## 1.3 Testimonials

### Top Banner

Title and Image that describes visually the content of the page.

### List of Testimonials

More detailed information on previous cases treated by the center. The idea is that this information will create an emotional connection with the user so he/she can make a better decision. Each review will have a profile image and text (story).

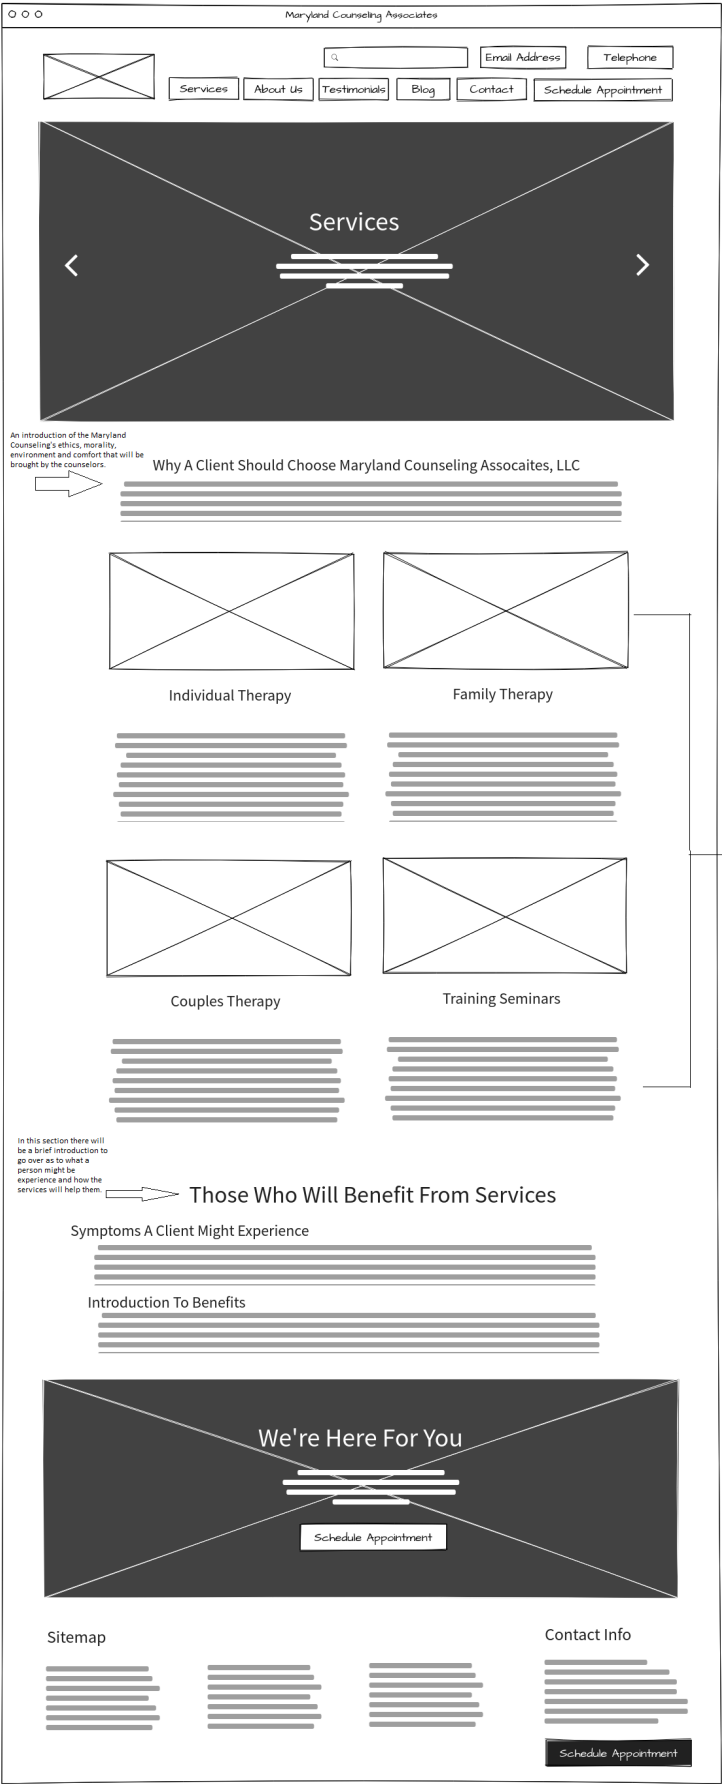

### Services

It is important to offer users the option to find out more information about services right after they are done reading the testimonials.

### Schedule Appointment

Once again, is important to give users the possibility of scheduling an appointment in case they feel they are ready to do so.
